# Part 1 *About us*

---

**MVI EcoPack** was founded in 2010, is a tableware specialist, with offices and factories in mainland China.

We are dedicated to offering our customers good quality and innovations at affordable prices. Our products are made from annually renewable resources like corn starch, sugarcane, and wheat straw fiber, some of which are by-products of the agriculture industry.

We use these materials to make sustainable alternatives to plastics and Styrofoam. We constantly monitor trends and seek out new products suitable for all clients in countries worldwide.

# Part 2 *Product Introduction*

Cups

Plates

Corn Starch Food Box

Food Box

Trays

Biodegradable Bag

CPLA Cutlery

Cup Holder

□ Bagasse Fiber

□ Cornstarch Fiber

□ PLA & CPLA

□ Water Barrier Coated Paper

□ Kraft Paper

## Materials

# *Bagasse Fiber*

## *WHY WE LOVE BAGASSE?*

### **Bagasse has a lower carbon footprint**

Bagasse is made from sugarcane waste. During the growth of the sugarcane, atmospheric carbon is captured by the plant and converted to biomass.

### **Bagasse is recyclable with cardboard**

Sugarcane packaging is suitable for recycling along with cardboard (as long as its clean and no food residue remains).

### **Sugarcane is a rapidly renewable and widely available resource**

In 2017, about 1.8 billion tonnes of sugarcane was harvested worldwide. While 30% of the crop yields sugar products, accounting for 95% of the revenue, the other two-thirds left after harvest has little economic value and is largely treated as waste. Utilising bagasse for packaging further maximises the value of the crop and aligns with the principles of a circular economy. (source)

## Food Box (Hot sale) 🔥

Item	Description	Size(cm)	weight (g)	PCS/CTN
MVF-001	1000ml Clamshell	Base:24.5*16.5*5 Lid:23.5*16*3	32	500

## *WHY SHOULD YOU SWITCH TO CORN STARCH PACKAGING?*

**Corn starch packaging can be very beneficial to the environment and your business.**

- Firstly, by switching to corn starch PLA, you can improve your brand by positioning yourself as a socially responsible and eco-friendly company. As a result, you can expect an increase in overall marketability because you'll effectively be able to attract environmentally conscious customers. Likewise, you can achieve a greater relevance in your industry because you're successfully able to keep up with the latest packaging trends related to sustainability.
- Most importantly, given the fact that the Canadian government is actively trying to implement a nationwide ban on single-use plastics, there isn't much leeway for businesses to continue using conventional plastics as restrictions will continue to increase.

However, by switching early on, you can gain a competitive edge as your product and service offerings will stand out from your competitors who are still using conventional plastics!

## Food Box (Hot sale) 🔥

Item	Description	Size(mm)	weight (g)	PCS/CTN
MVBC-03	2coms Lunch Box	240*175*65	48	200
